Education

Vellore Institute of Technology

B.Tech., Computer Science and Engineering

CGPA: 8.42/10

2023 – 2027

Maheshwari Public School, Jaipur, Rajasthan

CBSE, Higher Secondary Education

2016 – 2022

Experience

Predixion AI

Analyst Intern

September 2026 – Present

- **LeadX Platform & Campaigns:** Supported LeadX, Predixion's multi-tenant AI sales voice agent on Supabase, through a client's pre-approved loan calling campaign and progress reporting, and evaluated ElevenLabs as a second voice-agent provider alongside Voiz.
- **AI Voice-Call Analytics:** Analysed ~10,000 AI voice collection calls for a BNPL client, delivering a reproducible Python notebook and an executive memo/deck on call performance and collection outcomes.
- **Collections Portfolio Analysis:** Analysed a Stage-2 (1–30 DPD) personal loan collections database in PostgreSQL/Supabase, building data-validation checks and a reusable clean-base CTE layer, and turned the findings into a written report and a founder-facing case-study presentation.

Deloitte Touche Tohmatsu India LLP

Intern, Strategy, Risk & Transactions

Gurugram, India

May 2026 – August 2026

- **Bid Compliance Analytics:** Designed a Power BI dashboard on a star-schema data model with custom DAX measures to score 19 bidders against a 32-point NHA tender checklist, replacing a manual document-by-document review with an automated evaluation view.
- **Feasibility & Asset Monetisation:** Contributed to the feasibility study for a 10 MW Tier III data centre under a PPP model, covering demand assessment, site and infrastructure requirements and a 20-year operating case; built the reporting layer for the Asset Registration System, consolidating dispersed highway asset records into review-ready dashboards for stakeholder sign-off.

Ernst & Young LLP

Research Intern

Delhi, India

May 2025 – June 2025

- **CMRL Revenue Platform:** Developed the platform outline for Chennai Metro Rail Limited's (CMRL) fare-box and non-fare-box revenue streams, defining the functional and workflow structure for revenue collection, tracking and reconciliation.
- **Pre-Project Viability:** Performed GIS mapping of national highway stretches in Chhattisgarh and Uttar Pradesh for a pre-project viability report presented to the client, standardising asset records to support registration, analysis and decision-making.

Projects

TeleTrace | Python, SQLite, SQL | [Link](#)

- **ETL & Data Quality:** Built a five-stage ETL pipeline in pure Python and SQLite (generate, validate, clean, load, analyse) over 500 call-centre records seeded with missing fields, duplicates and malformed timestamps; every rejected record kept a failure reason alongside a run-level ingestion audit log.
- **Transformation & Reporting:** Normalised timestamps to IST and derived duration, hour and weekend attributes with flagged imputation into an idempotent SQLite schema, then answered business questions in SQL using conditional aggregation with CSV report exports.

Customer Churn Prediction (ChurnSense) | Python, Scikit-Learn, XGBoost, LightGBM, SHAP | [Link](#)

- **Modelling:** Analysed 440K+ customer records with engineered behavioural indicators; benchmarked Logistic Regression, Random Forest, XGBoost and LightGBM with SMOTE rebalancing, combined into a stacking ensemble evaluated on ROC-AUC, precision and recall.
- **Actionable Insights:** Identified churn drivers with SHAP, segmented customers with K-Means, and ran a cost-based retention ROI simulation to recommend targeted retention campaigns.

Technical Skills

Programming & Querying: Python, SQL, Java

Tools & Automation: Supabase, n8n, Power Automate, Git, GitHub, Jupyter Notebook, VS Code

Data & ML: Pandas, NumPy, Scikit-Learn, XGBoost, LightGBM, SHAP, TensorFlow, PyTorch, Keras

Analytics & BI: Power BI (DAX, star-schema modelling), Excel, Oracle Analytics Cloud, Matplotlib, Streamlit

Business & Methods: Requirement Gathering, Stakeholder Management, KPI Management, Data Modelling, ETL

Certifications & Achievements

- Microsoft Certified: Fabric Data Engineer Associate [Certificate](#)
- Oracle: Oracle Analytics Cloud Certified Professional [Certificate](#)
- University of Michigan: Applied Machine Learning in Python [Certificate](#)
- Published and presented a research paper on Wireless Capsule Endoscopy at ICNACT 2026 ([BleedDetectX](#)).

Leadership & Extracurricular

- **Co-Lead, Vitronix (Technical Club):** Scripted technical workshops and speaker sessions for a 300+ member community, coordinating design, outreach and logistics teams to support 110+ registrations.
- **Co-Lead, Mahro Rajasthan Club (Cultural Club):** Led a 7-member team across 4 events for 500+ students; standardised a bilingual script template and two-round review process.
